

EFL1002

10.0 T Li-ion Counterbalance Forklift Truck

- IC forklift design with li-Ion technology
- Li-Ion battery for opportunity charging & flexibility
- Multi chargers fulfilling different needs
- Market-proven components providing high durability

FEATURE

Li-ion technology

The EFL1002 adapts LFP Li-ion battery and there is no maintenance fee with no air filter, oil filter, engine oil or starter battery installed on the truck. Thanks to opportunity charging, this forklift can be charged at preferable time during the day without disrupting working schedules.

Thoughtful control strategy for operation safety

The EFL1002 comes with a BMS which consists of a master controller and two slave controllers, to lower the risks of truck suspension due to battery failure. When one slave controller is down, operators are able to drive the truck back to the shop for inspection and repair without calling for roadside assistance.

Multi chargers fulfilling different needs

The EFL1002 is equipped with an external three-phase charger as standard. To meet users' working shifts and conditions, dual chargers are available, which provides more flexibility and convenience.

Telematics

EFL1002 offers EP's latest Telematics. It provides the following features to facilitate your fleet management:

- Truck location in real-time
- Reports of truck usages and diagnosis
- Li-ion battery condition analytics

Market-proven components providing high durability

The EFL1002 features a strong chassis, which ensure a naturally long lifespan and durability.
